

ETFS 21Shares Ethereum ETF

Exchange Code: EETH

31 May 2022

Investment Objective

The ETFS 21Shares Ethereum ETF (Exchange Code: EETH) invests directly in ether, the native token of the Ethereum blockchain. It provides investors with a way to trade ether on tightly regulated exchanges, without the risks of losing their digital wallets.

About 21Shares

21Shares was founded in 2018 and is one of the world's largest issuers of crypto exchange-traded products (ETPs) based in Zug, Switzerland. 21Shares is a pioneer of the cryptocurrency industry having launched the world's first cryptocurrency ETP.

Fund Performance

CryptoCompare's Crypto Coin Comparison Aggregated Index ("CCCAGG") (Ethereum). CCCAGG represents a real-time, USD equivalent spot rate for ether. The index value is algorithmically calculated in real time based on observed trading activity on over 70 crypto exchanges.

ETFS 21Shares Ethereum ETF

Exchange Code: EETH

Product Description

EETH tracks the performance of the price of ether in Australian dollars before fees and expenses. It provides holders with an interest in physical ether held in cold storage by Coinbase. EETH units are redeemable for ether.

For top security, private keys to our digital wallets are broken into pieces – a practice called “sharding”. They are then held offline in military-grade vaults, out of the reach of hackers. Moving ether to and from EETH requires multiple signatures. In this way, EETH provides investors with an arguably more secure way of trading and owning ether than what is available on unregulated crypto venues.

Why EETH?

- Access one of the best performing assets the past 10 years.
- Trade ether on reputable and highly regulated exchanges.
- Use your existing brokerage account, without the risk of losing a Ethereum wallet or forgetting passwords.
